

ChatGPT prompts for creating AI / ML syllabi for NCERT-based classes:

1. Prompt:

As per the NCERT (India) syllabus, following is the curriculum of AI/ML subject for the [redacted] std. students:

<Paste the relevant NCERT syllabus content here>

2. Prompt:

Each of these modules is for 2-3 hours totaling to [redacted] hours. We have to create an e-learning content of 15 hours that includes e-learning videos of 15 hours. Also, we have to include appropriate exercises at the end of each module.

Suggest a revised curriculum that will give some practical or industrial perspective to these students? You may also list relevant, real-life examples in each module as appropriate. Remember, it's for [redacted] std students. So, the contents and the relevant examples should be easily understandable by them.

As it's e-learning content, while suggesting the exercises, do not suggest role-play or any other exercises that require more than one student.
